

Utica Midstream Conference: Politics, Policy, and Industry Impacts

Christina H. Polesovsky

May 20, 2021

Washington DC Update

- Biden Administration
- 117th Congress
- Ohio Industry Impacts

“We are at a pivotal moment – socially, politically and economically – with an opportunity to renew and rethink some of our industry’s longstanding priorities. ... No industry has done more to cut emissions throughout the economy thanks to voluntary action, rather than government mandates. No industry’s leadership and innovation has led to more emissions reductions in its products – like the fuels powering today’s new cars, SUVs and trucks, all of which are 99% cleaner than vehicles produced in 1970. Not to mention, the U.S. LNG exports that send American environmental progress all over the world.” –Mike Sommers, President & CEO, API

Columbus Update

- DeWine Administration
- 134th General Assembly
- Ohio Industry Impacts
